November 30, 2005

Members of the Board of Education, and Citizens of the Salt Lake City School District:

We are pleased to present the Comprehensive Annual Financial Report (CAFR) of the Salt Lake City School District for the year ended June 30, 2005. This report is published to present complete financial information on all the funds and financial activities of the District for the year. Responsibility for the accuracy of the statements, notes, schedules, and statistical tables rests with the District. We believe the information in this report is a fair presentation of the financial position and the results of operations of the District. The report is prepared in accordance with generally accepted accounting and financial reporting principles (GAAP) applicable to governmental entities. The reader will be able to gain a comprehensive understanding of the District's financial affairs from studying this report.

The report is organized in three sections labeled introductory, financial, and statistical. The introductory section includes this transmittal letter, reproductions of last year's GFOA Certificate of Achievement for Excellence in Financial Reporting and last year's ASBO Certificate of Excellence in Financial Reporting, administrative organizational chart, and members of the Board of Education.

The financial section contains the independent auditor's report, management discussion and analysis (MD&A), the basic financial statements, notes to the basic financial statements, and combining and individual fund statements and schedules.

The statistical section, which is not audited, presents selected financial and demographic data, generally in multiple year formats and is useful in allowing the reader to note trends and changes in the major activities of the District. This section also includes all disclosures, not contained elsewhere in the CAFR, to comply with the Securities and Exchange Commission continuing disclosure requirements for general obligation debt issues.

The District's 2005 Comprehensive Annual Financial Report includes all financial transactions of all schools and departments of the District, which are accounted for in various funds. These funds include the General Fund, Special Programs Fund and Child Nutrition Fund (Special Revenue Funds), Debt Service Fund, Capital Projects Fund, Internal Service Funds, and the Student Activities Fund (Agency Fund). The District is an independent political subdivision established by the constitution of the State of Utah and is not a part of any other governmental entity. Also, the Salt Lake Education Foundation is a discretely presented component unit of the District; the Foundation is a legally separate entity established to support the District. The Foundation's financial data is presented as a separate column on the government-wide financial statements of the District. There are no other units of government that are dependent on the District and, therefore, that should be included in this report.

### **District Profile**

The major purpose of the District is to provide public education for the approximately 23,310 students living within the boundaries of Salt Lake City, which are part of a total population of approximately 179,750 citizens. In accomplishing this goal, the District operates 39 schools comprised of 4 high schools, 5 intermediate schools, 27 elementary schools and 3 special schools. Additionally, the District operates several other educational programs. These include community schools, adult education opportunities, sheltered workshop programs, and many programs for at-risk and disabled students, along with programs for highly-motivated students. The Salt Lake Education Foundation is a component unit that provides enhancements to regular educational programs of the District through gifts and contributions.

### Management's Discussion and Analysis

GAAP requires management provide a narrative introduction, overview, and analysis (MD&A). This letter of transmittal is designed to complement the MD&A and should be read in connection with it. The District's MD&A can be found immediately following the report of the independent auditors.

### **Budget Controls**

The District adopts an annual budget for all governmental funds, which covers all revenues and expenditures of these funds. This budget acts as the operating plan for the fiscal year and is revised as necessary, following the requirements of Board policies and State law. Revisions may be made during the year authorizing a larger total appropriation of available resources after a public hearing and approval of the Board. A balanced budget by fund is required. The District may not make an appropriation that is in excess of its estimated revenue, undistributed reserves, and estimated fund balances available from a previous year.

The level at which expenditures may not exceed appropriations has been interpreted by the State Superintendent of Public Instruction to be the total budget of a given fund.

### **Internal Controls**

The business administrator, working with all of the business departments, is responsible for establishing and maintaining effective internal controls. These controls are designed to ensure protection of the District's assets and to ensure the accuracy of recorded transactions that are relied on in the preparation of financial reports. The internal controls are designed to provide reasonable assurance that these objectives are met. Internal controls undergo a continuing review by District staff and annually by the independent auditors. Because the cost of internal controls should not outweigh their benefit, the District's comprehensive framework of internal controls has been designed to provide reasonable rather then absolute assurance that the financial statements will be free from material misstatement

### Single Audit

For federal programs, the District is required to be subject to the Single Audit Act and to demonstrate compliance with the provisions of the federal government's Office of Management and Budget Circular A-133, Audits of State, Local Governments, and Non-profit Organizations. The Single Audit is conducted in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in Governmental Auditing Standards, issued by the Comptroller General of the United States; and the provisions of OMB Circular A-133. All of the Single Audit schedules, findings, recommendations, opinions, and reports on compliance and internal controls are issued in a report separate from this report.

### Looking Ahead

The economic outlook for the District is heavily dependent on state aid providing about half of general fund revenues. There are signs that the Utah and national economies are beginning to grow. The Utah legislature had a slight increase in available resources and allocated some new dollars to public education.

The state increased the value of the weighted pupil unit (WPU) from \$2,182 to \$2,280 (4.49%) for fiscal 2006. WPU funding for increased state-wide enrollment was raised by an additional 1.60%. The state also appropriated \$2.5 million for a new math and science job enhancement program, an additional \$10.7 million for retirement and social security costs, \$2 million for Quality Teaching Block Grants plus \$2 million for increased transportation costs. State funding for public education is projected to increase by about 5.3% in 2006. The District is expecting an increase in state funding of 2.7% for 2006. A decline of 313 students in the District's fiscal 2005 enrollment will further reduce the District's share of state resources in fiscal 2006. State funding is based on the previous year's enrollment. The District anticipates a decrease in enrollment of 34 students for fiscal 2006.

Higher interest rates are projected to increase investment earnings.

The District's assessed property valuation is expected to grow by some \$234 million for fiscal 2006. The total taxable assessed valuation is expected to stay about the same at \$15.3 billion in fiscal 2006. A slight tax rate increase plus new growth are projected to provide additional property tax revenue in fiscal 2006. The approved tax rate for the 2005 calendar year is .006128, this up from .006039 for the 2004 year.

The fiscal 2006 budget projects expenditure per pupil in the general fund of \$6,449, a decrease of 2.04% compared to the previous year's original budget. This is primarily due to budgeted reductions in instructional supplies and textbooks.

To help keep interest costs at a minimum, the District applies to Moody's Rating Services Inc. for ratings on impending bond issues. The District enjoys an Aaa rating, the highest granted by Moody's on general obligation bonds. The fiscal 2006 budget anticipates the sale of \$10 million in general obligation bonds. These proceeds will be used to bring all buildings in the District to current life-safety standards by either retrofitting or replacement. District voters approved a \$136 million bond authorization in May 1999. This will bring the total issued to \$104.7 million. During fiscal 2006, the District's unused legal debt capacity will be approximately \$637 million.

### **Continuing Developments**

The District continues its aggressive capital improvement plan it began several years ago. The purpose of the program is to upgrade every building in the District to meet current life-safety building code requirement, including earthquake and Americans with Disabilities Act access codes. It also provides for other building improvements, such as air conditioning.

The fiscal 2006 budget includes appropriations to complete or continue the following projects: Bonneville, Indian Hills, Highland Park and Washington elementary schools, plus Northwest, Bryant and Glendale middle schools. The fiscal 2006 budget also includes design and planning costs for the retrofitting of Emerson elementary school and replacement of Clayton middle school.

The District continually reviews the building program and also updates its overall multi-year capital improvement program. It is the District's policy to maintain all assets at a level adequate to protect the capital investment and to minimize future maintenance and replacement cost.

### Cash Management

In attempting to maximize earnings on short-term idle cash balances, the District uses the services of several firms, including a money management agreement with its primary bank which pays a higher rate of interest on overnight balances of the cash "sweep" accounts. The District maintains an account with the State Public Treasurers' Investment Pool that renders excellent liquidity along with generating an attractive rate of return on the deposits. For handling funds of a longer horizon, investment specialists are used to manage portfolios of select U.S. Government and corporate securities. All of these arrangements are kept in strict compliance with the State Money Management Act. The various treasury activities of the District are regulated by this Act, which sets forth investment limitations, standards for the proper management of cash, and reporting requirements. All investment and cash transactions are within the oversight of the State Money Management Council. Note 2 to the basic financial statements in the financial section of this report gives a more thorough explanation of these requirements and of the investment practices of the District.

The cash and investment positions of the District are very stable at \$92,240,889.

### Risk Management

The District provides protection for its employees, volunteers, and patrons in several ways. The District is self-insured for workers' compensation in case an employee or volunteer is injured at the workplace. Unemployment compensation benefits are paid to qualifying past employees by the State of Utah; subsequently, these expenses are reimbursed to the State by the District.

To protect the health and welfare of our employees, the District carries commercial insurance for major medical and accidental risks along with separate long-term disability and life insurance coverages. The District also provides a self-insured dental insurance plan for it's employees.

The District participates with other school districts and state agencies in a pooling arrangement for acquiring property and general liability insurance coverage. The Utah State Risk Management Fund separately manages this coverage.

### **Independent Audit**

State law requires an annual audit of the financial records of the District in order to provide a reasonable basis for financial users to rely on the information presented in the financial statements. The Board has retained Squire & Company, PC, Certified Public Accountants, to complete an independent audit of the financial position and activities of all of the funds of the District. Their opinion is included as page 11 of this report.

### **Awards**

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting (the Certificate of Achievement) to the Salt Lake City School District for its Comprehensive Annual Financial Report for the fiscal year ended June 30, 2004. We have received certificates continuously for twenty-nine years. In order to receive a Certificate of Achievement, a governmental unit must publish an easily readable and efficiently organized comprehensive annual financial report, whose contents conform to program standards. Such reports must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe our current report continues to conform to Certificate of Achievement Program requirements, and we are submitting this report to GFOA to determine its eligibility for another certificate.

The Association of School Business Officials (ASBO) has awarded its Certificate of Excellence to the Salt Lake City School District. This award certifies that the annual financial report for the year ended June 30, 2004, substantially conforms to the principles and standards of financial reporting as recommended and adopted by the Association of School Business Officials of the United States and Canada. The District believes that the 2005 annual report, which will be submitted to ASBO for an annual review, also conforms to these principles and standards.

### Acknowledgement

Many individuals helped in preparing this report, including members of the various business departments. We express our appreciation to the Accounting Department under the direction of Rick James, in particular for the major effort in closing the year and making sure that this report was prepared in a timely manner.

Special thanks go to members of the Board of Education for their continuing support and concern for the financial affairs of the District.

Respectfully submitted,

McKell Withers,

Superintendent of Schools

Kent G. Stephens,

Business Administrator

Certificate of Achievement for Excellence in Financial Reporting

Presented to

Salt Lake City School District,

Utah

For its Comprehensive Annual Financial Report for the Fiscal Year Ended June 30, 2004

A Certificate of Achievement for Excellence in Financial Reporting is presented by the Government Finance Officers Association of the United States and Canada to government units and public employee retirement systems whose comprehensive annual financial reports (CAFRs) achieve the highest standards in government accounting and financial reporting.

# Administrative Organizational Chart Salt Lake City School District

### THE ADMINISTRATION

The Board of Education appoints a superintendent and a business administrator whose duties and responsibilities are to some extent prescribed by Utah State statutes. The following is an organizational chart for District administration.

### Salt Lake City School District

### Members of the Board of Education

The Board of Education is comprised of seven individuals elected by precinct in a general election. Board members serve four-year terms and the terms are staggered so that not more than four board members are elected in any one election. There is also a non-voting student member of the board who is appointed by the elected members after a recommendation by high school students.

Laurel Young, President	Precinct Number Six
Douglas Nelson, Vice President	Precinct Number Three
Clifford Higbee	Precinct Number One
Alama Uluave	Precinct Number Two
John deJong	Precinct Number Four
Heather Bennett	Precinct Number Five
Kristi Swett	Precinct Number Seven
Sophie Jin	Student Board Member

### Independent Auditor's Report

Board of Education Salt Lake City School District

We have audited the accompanying financial statements of the governmental activities, each major fund, and the aggregate discretely presented component unit and remaining fund information of Salt Lake City School District (the District), as of and for the year ended June 30, 2005, which collectively comprise the District's basic financial statements as listed in the table of contents. These financial statements are the responsibility of District management. Our responsibility is to express opinions on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and the significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinions.

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, each major fund, and the aggregate discretely presented component unit and remaining fund information of the District as of June 30, 2005, and the respective changes in financial position and cash flows, where applicable, thereof and the respective budgetary comparison for the general fund for the year then ended in conformity with accounting principles generally accepted in the United States of America.

In accordance with Government Auditing Standards, we have also issued our report dated September 16, 2005 on our consideration of the District's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with Government Auditing Standards and should be considered in assessing the results of our audit.

The management's discussion and analysis which follows this report is not a required part of the basic financial statements but is supplementary information required by the Governmental Accounting Standards Board. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the required supplementary information. However, we did not audit the information and express no opinion on it.

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the District's basic financial statements. The introductory section, combining and individual fund financial statements and schedules, and statistical tables are presented for purposes of additional analysis and are not a required part of the basic financial statements. The combining and individual fund financial statements and schedules have been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, are fairly stated in all material respects in relation to the basic financial statements taken as a whole. The introductory section and statistical tables have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we express no opinion on them.

Squis Company, PC

September 16, 2005

### Management's Discussion and Analysis

This section of Salt Lake School District's (District) comprehensive annual financial report presents management's discussion and analysis of the District's financial performance during the year ending June 30, 2005. Please read it in conjunction with the transmittal letter found on pages 1 through 5 of this report and the District's financial statements, which follow this section.

### Financial Highlights

- The District's total assets exceeded liabilities by \$210.5 million at the close of the most recent fiscal year.
- During the year, expenses were \$5.9 million less than the \$194.7 million generated in taxes and other revenues for governmental activities. This year was similar to than last year, when expenses were less than revenues by \$5.6 million.
- Student enrollment decreased by 313 students to a total of 23,310 students for fiscal 2005. As a result of this decline in enrollment state aid has only increased by \$1.7 million or 2.4% from the previous year while statewide funding increased by 6.7%.
- Property tax revenues increased by \$3.4 million due to an increase in tax rates from .006018 to .006039 and an increase in the taxable value of property.
- The District started four additional capital projects during the year ended June 30, 2005 at a projected cost of \$36.4 million. This brings the total of capital projects under construction to a total of \$77.7 million. The four latest projects are the replacement of Highland Park elementary school and Glendale middle school and the retrofit of Bryant middle school, and the Beardsley Place remodel. During the year the District completed the replacement of two elementary schools and the retrofit of two elementary schools at a cost of \$24.2 million.

### Overview of the Financial Statements

This discussion and analysis is intended to serve as an introduction to the District's basic financial statements. The District's basic financial statements comprise three components: 1) government-wide financial statements, 2) fund financial statements, and 3) notes to the basic financial statements. This report also contains other supplementary information in addition to the basic financial statements themselves.

Government-wide financial statements. The government-wide financial statements are designed to provide readers with a broad overview of the District's finances, in a manner similar to a private-sector business.

The statement of net assets presents information on all of the assets and liabilities of the District, with the difference between the two reported as net assets. Over time, increases or decreases in net assets may serve as a useful indicator of whether the financial position of the District is improving or deteriorating.

The statement of activities presents information showing how the net assets of the District changed during the most recent fiscal year. All changes in net assets are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of related cash flows. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in future fiscal periods (e.g., uncollected taxes and earned but unused vacation leave).

The government-wide financial statements can be found on pages 22 and 23 of this report.

Fund financial statements. A fund is a group of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. The District, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. All of the funds of the District can be divided into three categories: governmental funds, proprietary funds, and fiduciary funds.

• Governmental funds. Governmental funds are used to account for essentially the same functions reported as governmental activities in the government-wide financial statements. However, unlike the government-wide financial statements, governmental fund financial statements focus on near-term inflows and outflows of spendable resources, as well as on balances of spendable resources available at the end of the fiscal year. Such information may be useful in evaluating the District's near-term financing requirements.

Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for *governmental funds* with similar information presented for *governmental activities* in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the District's near-term financing decisions. Both the governmental fund balance sheet and the governmental fund statement of revenues, expenditures, and changes in fund balances provide a reconciliation to facilitate this comparison between governmental funds and governmental activities.

The District maintains five individual governmental funds. Information is presented separately in the governmental fund balance sheet and in the governmental fund statement of revenues, expenditures, and changes in fund balances for the *general fund*, the *debt service fund*, and the *capital projects fund*, each of which are considered to be major funds. Data from the other two governmental funds are combined into a single, aggregated presentation. Individual fund data for each of these nonmajor governmental funds is provided in the form of *combining statements* elsewhere in this report.

The District adopts an annual appropriated budget for its *general fund*. A budgetary comparison statement has been provided for the general fund to demonstrate compliance with this budget.

The basic governmental fund financial statements can be found on pages 24 to 28 of this report.

• Proprietary funds. Internal service funds are an accounting device used to accumulate and allocate costs internally among the District's various functions. The District uses four internal service funds to account for services provided to all the other funds of the District: distribution services, printing and graphics, technical services, and employee benefits. The internal service funds have been included within governmental activities in the government-wide financial statements.

The four internal service funds are combined into a single, aggregated presentation in the proprietary fund financial statements. Individual fund data for the internal service funds is provided in the form of *combining statements* elsewhere in this report. The basic proprietary fund financial statements can be found on pages 29 to 31 of this report.

• **Fiduciary funds.** Fiduciary funds are used to account for resources held for the benefit of parties outside the governmental entity. Fiduciary funds are *not* reflected in the government-wide financial statement because the District cannot use these funds to finance its operations.

The District uses an agency fund to account for resources held for student activities and groups. The basic fiduciary fund financial statement can be found on page 32 of this report.

Notes to the basic financial statements. The notes provide additional information that is essential for a full understanding of the data provided in the government-wide and fund financial statements. The notes to the basic financial statements can be found on pages 33 to 48 of this report.

Other information. The combining statements referred to earlier in connection with nonmajor governmental funds and internal service funds are presented immediately following the notes to the financial statements. Combining and individual fund statements and schedules can be found on pages 49 to 65 of this report.

### Government-wide Financial Analysis

As noted earlier, net assets may serve over time as a useful indicator of a government's financial position. In the case of the District, assets exceeded liabilities by \$210.5 million at the close of the most recent fiscal year.

### SALT LAKE SCHOOL DISTRICT'S Net Assets

(in millions of dollars)
June 30, 2005 and 2004

	Governmen	change		
	2005	 2004	2005-2004	
Current and other assets	\$ 187.5	\$ 183.2	\$	4.3
Capital assets	288.0	 261.4		<b>26</b> .6
Total assets	 475.5	444.6		30.9
Other liabilities	117.1	120.3		(3.2)
Long-term liabilities outstanding	 147.9	 119.7		28.2
Total liabilities	265.0	240.0		25.0
Net assets:				
Invested in capital assets, net of related debt	160.5	149.9		10.6
Restricted	24.4	27.0		(2.6)
Unrestricted	25.6	 27.7		(2.1)
Total net assets	\$ 210.5	\$ 204.6	\$	5.9

- The largest portion of the District's net assets (76%) reflects its investment in capital assets (e.g., sites, buildings, equipment and vehicles net of accumulated depreciation), less any related debt (general obligation bonds payable less unspent bond proceeds) used to acquire those assets that is still outstanding. The District uses these capital assets to provide services to students; consequently, these assets are *not* available for future spending. Although the District's investment in its capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities.
- An additional portion of the District's net assets (12%) represents resources that are subject to external restrictions on how they may be used. The majority of the restricted balance is for capital projects.
- The remaining balance of *unrestricted net assets* (12%) may be used to meet the District's obligations to students, employees, and creditors and to honor next year's budget.

At the end of the current fiscal year, the District is able to report positive balances in all three categories of net assets. The same situation held true for the prior fiscal year.

Capital assets, net of related debt increased by \$10.6 million during the year ended June 30, 2005. This increase was the result of the District's capital improvement plan to upgrade all buildings throughout the District. Capital assets are financed with general obligation bonds and property tax levies for capital outlay.

The District's net assets increased by \$5.9 million during the current year. The following discussion and analysis on governmental activities focuses on this increase:

Governmental activities. The key elements of the increase of the District's net assets for the year ended June 30, 2005 are as follows:

• The largest dollar change in revenues is from property taxes. Property tax revenues increased by \$3.4 million due to an increase in tax rates from .006018 to .006039 and an increase in the taxable value of property.

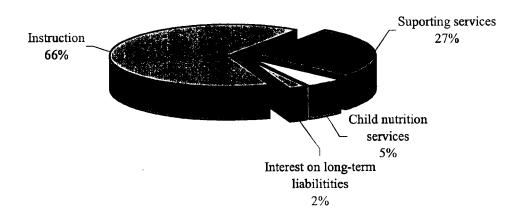

Federal and state aid increases are a reflection of changes in funding for specific programs. Federal and state revenues increased by \$3.9 million. State aid increased by \$1.7 million even though the District experienced a 658 decrease in the number of weighted pupil units (WPUs). State aid is based primarily on WPUs and other appropriations. If a student is in membership a full 180 days, the state awards the District one WPU. The state guarantees that if local taxes generated by the required basic tax levy do not provide money equal to the amount generated by the WPU it will make up the difference with state funding. Certain special students receive a weighting greater than one. The value of the WPU increased by 1.5% during the year ended June 30, 2005 (\$2,182 during fiscal 2005 as compared to \$2,150 in fiscal 2004).

• Instruction represents the largest dollar increase in expense of \$5.4 million due to teacher step and lane costs, increases in health care insurance premiums, and other employee benefits. There was a 1.5% cost of living increase given for salaries in fiscal 2005.

### Financial Analysis of the District's Funds

As noted earlier, the District uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements.

Governmental funds. The focus of the District's governmental funds is to provide information on near-term inflows, outflows, and balances of spendable resources. Such information is useful in assessing the District's financing requirements. As the District completed the year, its governmental funds reported a combined fund balance of \$60.3 million, \$8.1 million higher than the previous year. Included in this year's change in the total fund balance is an increase in the fund balance of the capital projects fund of \$9.5 million; this year's change also includes a decrease in the fund balance of the general fund of \$2.1 million. The primary reasons for the general fund's decrease mirror those highlighted in the analysis of governmental activities. In addition, the following other changes in fund balances should be noted:

- Expenditures for general District purposes totaled \$145.3 million, an increase of 7.5% during the current fiscal year. This compares to a 1.7% increase in fiscal 2004. Instruction represents 68.9% of general fund expenditures.
- General fund salaries totaled \$95.3 million while the associated employee benefits of retirement, social security, insurance (health and accident, industrial, and unemployment) added \$30.4 million to arrive at 86.8% of total general fund expenditures.
- Governmental funds report the differences between their assets and liabilities as fund balance, which is divided into reserved and unreserved portions. Reservations indicate the portion of the District's fund balances that are not available for appropriation. The unreserved fund balance is, in turn, subdivided between designated and undesignated portions. Designations reflect the District's self-imposed limitation on the use of otherwise available expendable financial resources in governmental funds. Undesignated balances in the general fund are required by state law to be appropriated in the following year's budget. Fund balances of debt service, capital projects, and other governmental funds are restricted by state law to be spent for the purpose of the fund and are not available for spending at the District's discretion. Of the \$23.5 million fund balance in the general fund, \$7.0 million is designated for general contingencies as allowed by state law; this amount, limited to 5.0% of general fund budgeted expenditures, is set aside for contingencies or possible reductions in state funding and is not to be used in the negotiation or settlement of contract salaries. The maintenance of a sufficient reserve is a key credit consideration in the District's excellent bond rating of Aaa given by Moody's Investor Service. The capital projects fund reported a \$33.2 million fund balance at June 30, 2005.

### **General Fund Budgetary Highlights**

During the year, the Board revised the District's budget. Budget amendments were to reflect changes in programs and related funding. The difference between the original budget and the final amended budget was an increase of \$3.7 million or 2.5% in total general fund expenditures. The most significant budgetary adjustments may be summarized as follows:

- \$3.1 million or 2.9% increase in instruction, to reflect carryover allocations for supplies and equipment not spent in the previous year.
- \$0.5 million or 4.0% increase in media services and educational supervision for the receipt of new grants.
- \$0.8 million or 5.4% decrease in operation and maintenance of school buildings due to reduced utility costs.
- \$0.5 million or 6.2% increase in general school administration reflects additional supply and salary costs.

Even with these budget adjustments, actual expenditures were \$9.1 million below final budgeted amounts. The most significant variance may be summarized as follows:

- \$7.2 million or 6.7% positive variance in instruction, due to unspent supply allocations and equipment budgets which are carried over to the next year.
- \$0.7 million or 5.4% positive variance in media services and educational supervision due to unspent library supply allocations and federal grants which are carried over to the next year.
- \$0.6 million or 4.0% positive variance in operation and maintenance of school buildings due to savings in utility costs.

Resources available for appropriation were \$0.7 million below the final budgeted amount. Variances in state and federal revenues primarily result from expenditure-driven grants that are included in the budgets at their full amounts. Such grants are recognized as revenue when the qualifying expenditures have been incurred and all other grant requirements have been met; unspent grant amounts are carried forward and included in the succeeding year's budget. Therefore, actual grant revenues and expenditures are normally less than the amounts budgeted. The district deferred \$4.2 million in unearned state revenue at June 30, 2005. Revenue from other local sources surpassed projections because a payment received late in the year from Salt Lake Redevelopment Agency exceeded expectations.

### Capital Asset and Debt Administration

Capital Assets. The capital projects fund is used to account for the costs incurred in acquiring and improving sites, constructing and remodeling facilities, and procuring equipment necessary for providing educational programs for all students within the District. During fiscal 2005 one intermediate retrofit project, one intermediate replacement and one replacement elementary school was begun. These new projects were in addition to two elementary schools and one intermediate school replacements previously under construction for a total projected cost of \$75.5 million. With the exception of Indian Hills and Bonneville elementary replacements and Northwest intermediate replacement (which will be completed in fiscal 2006) all projects were substantially completed during fiscal 2005. During fiscal 2005 one intermediate school retrofit project and two replacement intermediate schools were begun at a projected cost of \$34.3 million. Of the total projects underway at the end of the year that total \$77.7 million, projected cost to complete all projects begun to date is \$39.1 million. At the end of the year there was a reservation of fund balance in the capital projects fund of \$33.1 million plus the receipt of future property taxes and/or bond proceeds will be used to fulfill the required costs to complete various projects in progress at June 30, 2005.

Capital assets at June 30, 2005 and 2004 are outlined below:

### SALT LAKE CITY SCHOOL DISTRICT'S Capital Assets

Vehicles		2.4	*************************	2.0		0.4	
Total capital assets, net	\$	288.0	\$	261.4	\$	26.6	

Additional information on the District's capital assets can be found in Note 4 to the basic financial statements.

**Debt Administration.** In May of 1999, the District held a bond election where voters authorized \$136.0 million in debt. Of the \$136.0 million authorization, the District has issued \$104.7 million leaving a remaining authorized but unissued amount of \$31.3 million. Moody's Investor Services has awarded an Aaa rating to all outstanding issues.

The general obligation bonded debt of the District is limited by state law to 4% of the fair market value of the total taxable property in the District. The legal debt limit at June 30, 2005 is \$777.8 million. Net general obligation debt at June 30, 2005 is \$140.4 million, resulting in a legal debt margin of \$637.4 million.

Although it is not unusual for governments to have a 30-year bond payoff schedule, the District maintains an aggressive schedule to retire all of its current general obligation bonds by 2025.

Additional information on the District's long-term debt can be found in Note 8 to the basic financial statements.

### Changing Enrollment within the District

Each year, for many years, historical information has been kept relative to the number of students who leave District schools for various reasons and the number of students who enter the schools in each age group. From this database, implied estimates of migration of students in and out of the District are made. Birth data is also projected forward adjusted by implied estimates as described above. These projections of enrollment and average daily membership have been very accurate in the past. Currently the District is projecting average daily membership to show small changes over the next few years.

### SALT LAKE CITY SCHOOL DISTRICT'S Changing Enrollment Average Daily Membership (ADM)

District Fiscal Year	2004	2005	2006 *	2007 *	2008 *	2009 *
Average Daily Membership	23,623	23,310	23,276	23,052	23,017	22,898

<sup>\*</sup> Projected ADM

The District's enrollment for the year ending June 30, 2005 decreased by 313 students in average daily membership compared to the prior year.

### **Requests for Information**

This financial report is designed to provide a general overview of the Salt Lake City School District's finances for all those with an interest in the District's finances. Questions concerning any of the information provided in this report or requests for additional financial information should be addressed to the Office of the Business Administrator, Salt Lake City School District, 440 East First South, Salt Lake City, UT 84111.

# Reconciliation of the Balance Sheet of Governmental Funds to the Statement of Net Assets *June 30, 2005*

Total fund balances for governmental funds	\$	60,295,643		
Total net assets reported for governmental activities in the statement of net assets is different because:				
Capital assets used in governmental funds are not financial resources and therefore are not reported in the funds. Those assets consist of:				
Sites       \$ 31,717,467         Construction in progress       38,576,652         Buildings, net of \$139,969,375 accumulated depreciation       213,298,702         Equipment, net of \$3,818,628 accumulated depreciation       1,920,810         Vehicles, net of \$4,160,572 accumulated depreciation       2,425,888	;	287,939,519		
Some of the District's property taxes will be collected after year-end, but are not available soon enough to pay for the current period's expenditures, and therefore are reported as deferred revenue in the funds.				
Interest on long-term debt is not accrued in governmental funds, but rather is recognized as an expenditure when due.				
Bond issuance costs are reported as expenditures in the governmental funds. The cost is \$901,639 and accumulated amortization is \$121,131.				
Internal service funds are used by management to charge the costs of warehouse, printing and graphics, technical, and employee benefit services to individual funds. The assets and liabilities of the internal service funds are included in governmental activities in the statement of net assets. Internal service fund net assets at year-end are:		411,044		
Long-term liabilities that pertain to governmental funds are not due and payable in the current period and therefore are not reported as fund liabilities. All liabilities - both current and long-term - are reported in the statement of net assets. Balances at year-end are:				
General obligation bonds payable Unamortized deferred amounts on refunding Unamortized premiums and discounts  Total net assets of governmental activities  (140,667,722) 2,161,241 (1,877,032)		140,383,513) 210,556,545

# Reconciliation of the Statement of Revenues, Expenditures, and Changes in Fund Balances of Government Funds to the Statement of Activities

Year Ended June 30, 2005

### Net change in fund balances-total governmental funds

\$ 8,079,161

26.630.047

Amounts reported for governmental activities in the statement of activities are different because:

Governmental funds report capital outlays as expenditures. However, in the statement of activities, assets with an initial, individual cost of more than \$5,000 for sites, equipment, and vehicles and \$100,000 for buildings are capitalized and the cost is allocated over their estimated useful lives and reported as depreciation expense. This is the amount by which capital outlays exceeded depreciation in the current period.

Capital asset purchases	\$ 36 <b>,04</b> 5,407	
Loss on sale of capital assets	(33,407)	
Proceeds from sales of capital assets	(1,088)	
Depreciation expense	 (9,380,865)	:

The governmental funds report bond proceeds as financing sources, while repayment of bond principal is reported as an expenditure. In the statement of net assets, however, issuing debt increases long-term liabilities and does not affect the statement of activities and repayment of principal reduces the liability. Also, governmental funds report the effect of issuance costs and premiums when debt is first issued, whereas these amounts are deferred and amortized in the statement of activities. Interest is recognized as an expenditure in the governmental funds when it is due. In the statement of activities, however, interest expense is recognized as it accrues, regardless of when it is due. The net effect of these differences in the treatment of general obligation bonds and related items is as follows:

Repayment of bond principal	6 <b>,26</b> 5,000		
General obligation bonds issued	(35,000,000)		
Premium on general obligation bond	(63,642)		
General obligation refunding bonds issued	(19,665,000)		
Premium on refunding bond	(1,385,927)		
Payment to refunded bond escrow agent	20,899,708		
Bond issuance costs	<b>29</b> 7,569		
interest expense	180,280		
Amortization of bond issuance costs	(47,165)		
Amortization of bond premiums and discounts	55,048	,	
Amortization of deferred amounts on refunding	(105,975)	(28,570,104)	

Property tax revenues received prior to the year for which they are being levied are reported as deferred revenue in the governmental funds. They are, however, recorded as revenues in the statement of activities. Deferred property tax revenues decreased this year.

(280,422)

Internal service funds are used by the District to charge the costs of distribution, printing and graphics, technical, and employee benefit services to individual funds. The net revenue of the internal service funds is reported with governmental activities.

### SALT LAKE CITY SCHOOL DISTRICT Notes to Basic Financial Statements

#### 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The financial statements of the Salt Lake City School District have been prepared in conformity with accounting principles generally accepted in the United States of America (GAAP) as applied to local government units. The Governmental Accounting Standards Board (GASB) is the accepted standard-setting body for establishing governmental accounting and financial reporting principles. The more significant accounting policies of the District are described below.

Reporting entity – The Board of Education, comprised of seven elected individuals, is the primary governing authority for the District. As required by GAAP, these financial statements present the District and all entities for which the District is considered to be financially accountable. The District is not a component unit of any other primary government.

• Discretely presented component unit. The Salt Lake Education Foundation is a nonprofit organization established under Internal Revenue Service regulations as a conduit for tax-deductible donations to the District. The Foundation's board is approved by the Board of Education. The Foundation exclusively services the District. The Foundation is presented as a discretely presented component unit of the District as a governmental fund. Financial information specific to the Foundation may be obtained by writing the Foundation at 440 East 100 South, Salt Lake City, UT 84111.

Government-wide and fund financial statements – The government-wide financial statements (the statement of net assets and the statement of changes in net assets) display information about the primary government (the District). These statements include the financial activities of the overall District and its component unit, except for fiduciary activities. As a general rule the effect of interfund activity has been eliminated from the government-wide financial statements.

The statement of activities presents a comparison between direct expenses and program revenues for each function of the District's governmental activities. Direct expenses are those that are specifically associated with a function and, therefore, are clearly identifiable to a particular function. Depreciation expense for capital assets that can specifically be identified with a function are included in its direct expenses. Depreciation expense for "shared" capital assets (for example, a school building is used primarily for instruction, library media and educational supervision, school administration, operation and maintenance of school buildings, and child nutrition services) are ratably included in the direct expenses of the appropriate functions. Indirect expense allocations that have been made in the funds have been reversed for the statement of activities. Interest on general long-term liabilities is considered an indirect expense and is reported in the statement of activities as a separate line. Program revenues include 1) fees and charges paid by students and other recipients of goods or services offered by a given function, and 2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function. Revenues that are not classified as program revenues, including property taxes, are presented as general revenues.

The fund financial statements provide information about the District's funds, including its fiduciary fund. Separate statements for each fund category (governmental, proprietary, and fiduciary) are presented. The emphasis of fund financial statements is on major governmental funds, each displayed in a separate column. All remaining governmental funds are aggregated and reported as nonmajor funds.

Proprietary fund operating revenues, such as charges for services, result from exchange transactions associated with the principal activity of the fund. Exchange transactions are those in which each party receives and gives up essentially equal values. Nonoperating revenues, such as subsidies and investment

#### Notes to Basic Financial Statements

Continued

earnings, result from nonexchange transactions or ancillary activities. Operating expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations, including cost of sales and services, administrative expenses, and depreciation on capital assets.

The District reports the following major governmental funds:

- The general fund is the District's primary operating fund. It accounts for all financial resources of the general government, except those required to be accounted for in another fund.
- The *debt service fund* accounts for the resources accumulated and payments made for principal and interest on general obligation bonds payable.
- The capital projects fund accounts for resources accumulated and payments made for the acquisition and improvement of sites, construction and remodel of facilities, procurement of equipment, textbooks, and supplies necessary for providing educational programs for all students within the District.

Additionally, the District reports the following fund types:

- Internal service funds (proprietary funds) account for distribution services, printing and graphics, technical services, and employee benefits services provided to other funds of the District on a cost-reimbursement basis.
- The student activities agency fund (a fiduciary fund) account for monies held on behalf of student groups.

Measurement focus, basis of accounting, and financial statement presentation — The government-wide financial statements are reported using the economic resources measurement focus, as are the proprietary fund financial statements. Because agency funds are custodial in nature, they do not measure results of operations or have a measurement focus. The government-wide, proprietary, and agency fund financial statements are reported using the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded at the time liabilities are incurred, regardless of when the related cash flows take place. Nonexchange transactions, in which the District receives value without directly giving equal value in exchange, include property taxes, grants, and donations. On an accrual basis, revenue from property taxes is recognized in the fiscal year for which taxes are levied. Revenue from grants and donations is recognized in the fiscal year in which all eligibility requirements have been satisfied.

Governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Under this method, revenues are recognized when measurable and available. The District considers all revenues reported in the governmental funds to be available if the revenues are collected within thirty days after year-end. Property taxes and interest are considered to be susceptible to accrual. Expenditure driven grants are recognized as revenue when qualifying expenditures are incurred and all other grant requirements are met; grants received in advance are recorded as deferred revenue until earned. All other revenue items are considered to be measurable and available only when the District receives cash. Expenditures generally are recorded when the related fund liability is incurred, except for principal and interest on general long-term debt, claims and judgments, and long-term employee benefits, which are recognized as expenditures to the extent they have matured. General capital asset acquisitions are reported as expenditures in governmental funds. Proceeds of general long-term debt and acquisitions under capital leases are reported as other financing sources.

#### **Notes to Basic Financial Statements**

Continued

Under the terms of grant agreements, the District funds certain programs by a combination of specific cost-reimbursement grants, categorical block grants, and general revenues. Thus, when program expenses are incurred, there are both restricted and unrestricted net assets available to finance the program. It is the District's policy to first apply cost-reimbursement grant resources to such programs, followed by categorical block grants, and then by general revenues.

Budgetary Data – Budgets are presented on the modified accrual basis of accounting for all governmental funds. Budgets are not adopted on a District level for the student activities agency fund. All annual appropriations lapse at fiscal year-end with the exception of those indicated as a fund balance reserve. The following procedures are used in establishing the budgetary data reflected in the financial statements.

- During May of each year, the District superintendent submits to the Board a proposed operating budget for the next fiscal year commencing July 1st. This budget includes proposed expenditures and the means of financing them. Included also is a final budget for the current year ending June 30th.
- Copies of the proposed budget are made available for public inspection and review by patrons of the District.
- If the District does not exceed the certified tax rate, a public hearing is held prior to June 22 at which time the budget is legally adopted by resolution of the Board after obtaining taxpayer input. If the District exceeds the certified tax rate, the budget is adopted in August when data is available to set the rates.
- Once adopted, the budget can be amended by subsequent Board action. The Board upon recommendation of the superintendent can approve reductions in appropriations, but increases in appropriations by fund require a public hearing prior to amending the budget. In accordance with Utah state law, interim adjustments may be made by administrative transfer of money from one appropriation to another within any given fund.
- Certain interim adjustments in estimated revenue and expenditures during the year ended June 30, 2005, have been included in the final budget approved by the Board, as presented in the financial statements.
- Expenditures may not legally exceed budgeted appropriations at the fund level.

Encumbrance accounting is employed in the governmental funds. Encumbrances (e.g., purchase orders and contracts) outstanding at year end are reported as reservations of fund balances and do not constitute expenditures or liabilities because the commitments will be reappropriated and honored during the subsequent year.

Negative variances in total revenues and the positive variances in total expenditures are largely a result of federal and state program revenues and related expenditures that do not have a direct impact on the undesignated fund balance. Budgets generally assume the expenditure of all available resources. Therefore, when the budget is prepared, it is assumed these funds will not have a carryover of revenue to a subsequent year. Program revenue received but not spent is restricted and deferred to the subsequent fiscal year. As a result, overall fund revenue variances will be negative, and overall fund expenditure variances will be positive.

#### Notes to Basic Financial Statements

Continued

Deposits and Investments – The cash balances of substantially all funds are pooled and invested by the District for the purpose of increasing earnings through investment activities and providing efficient management of temporary investments. The pool's investments are reported at fair value at year-end. Changes in the fair value of investments are recorded as investment earnings. Earnings on pooled funds are apportioned and paid or credited to the funds based on the average balance of each participating fund.

Cash and Cash Equivalents – The District considers cash and cash equivalents in proprietary funds to be cash on hand, demand deposits, and short-term investments with original maturities of three months or less from the date of acquisition, including investments in the Public Treasurers' Investment Fund (PTIF).

Receivables and Payables – Activity between funds that are representative of lending/borrowing arrangements outstanding at year-end are referred to as "due to/from other funds."

Inventories – Inventories are valued at cost or, if donated, at fair value when received, using the weighted average method. Inventories of all funds are recorded as expenditures/expenses when consumed rather than when purchased.

Capital Assets – Capital assets, which include sites, buildings, equipment, and vehicles are reported in the government-wide financial statements. The District defines capital assets as assets with an initial, individual cost of more than \$5,000 for sites, equipment, and vehicles and \$100,000 for buildings and an estimated useful life in excess of two years. Purchased or constructed capital assets are reported at cost or estimated historical cost. Donated capital assets are recorded at estimated fair value at the date of donation. The cost of normal maintenance and repairs that do not add to the value of the asset or materially extended assets' lives are not capitalized.

Major outlays for capital assets and improvements are capitalized as projects are constructed. Interest incurred during construction is not capitalized.

Buildings, equipment, and vehicles of the District are depreciated using the straight-line method over the following estimated useful lives:

Assets	Years
Buildings	40
Building improvements and portable classrooms	20
Maintenance equipment	15
Vocational education equipment	15
Buses	10
Musical instruments	10
Child nutrition equipment	10
Athletic equipment	8
Vehicles	8
Audio visual equipment	6
Copiers and printers	5
Computer equipment	3

Most works of art are not capitalized or depreciated. These assets are held for public exhibition, education, or research rather than financial gain.

#### **Notes to Basic Financial Statements**

Continued

Compensated Absences – The District accrues salary related payments for vacation benefits for twelvemonth or full-year contract employees. Employees accrue between ten and twenty days a year, and are limited to a maximum of the number of days earned in two years or two and a quarter years depending upon the employee class and the length of service with the District. The District is liable to the employee for days earned but not taken. If an employee terminates, then a payment is made; otherwise, scheduled vacation time off is allowed.

A retiring teacher who meets the provisions of the Utah State Employees' Retirement Act is eligible to receive a benefit equal to 19% of the employee's accumulated unused sick leave. This is the only sick leave benefit that accumulates and vests for an employee.

All vacation pay and vested sick leave plus related payroll taxes are accrued when incurred in the government-wide and internal service fund financial statements. A liability for these amounts is reported in the governmental funds only if they have matured, for example, as a result of employee resignations and retirements.

Long-term Obligations – In the government-wide financial statements and internal service fund financial statements, long-term debt and other long-term obligations are reported as liabilities in the applicable statement of net assets. Bond premiums and discounts, as well as issuance costs, are deferred and amortized over the life of the bonds using the straight-line method, which approximates the effective interest method. Bonds payable are reported net of the applicable bond premium or discount. Bond issuance costs are reported as deferred charges and amortized over the term of the related debt.

In the fund financial statements, governmental fund types recognize bond premiums and discounts, as well as bond issuance costs, during the current period. The face amount of debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources while discounts on debt issuances are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as expenditures.

Fund Equity – In the fund financial statements, governmental funds report reservations of fund balance for amounts that are not available for appropriation or are legally restricted by outside parties for use for a restricted purpose. Designations of fund balance represent tentative plans for future use of financial resources that are subject to change.

Comparative Data and Reclassifications – Comparative data for the prior year has been presented in certain sections of the accompanying financial statements in order to provide an understanding of changes in the District's financial position and operations. Also, certain amounts presented in the prior year data have been reclassified in order to be consistent with current year's presentation.

#### Notes to Basic Financial Statements

Continued

#### 2. DEPOSITS AND INVESTMENTS

Deposits and investments are carried at fair value. A reconciliation of cash and investments at June 30, 2005, as shown on the financial statements is as follows:

Carrying amount of deposits Carrying amount of investments	· \$	6 <b>,29</b> 9,523 85 <b>,9</b> 41,366
Total cash and investments	\$	92,240,889
Governmental funds cash and investments Internal service funds cash and investments Agency fund cash and investments Component unit cash and investments	\$	79,578,930 7,755,042 2,049,942 2,856,975
Total cash and investments	\$	92,240,889

The District complies with the State Money Management Act (Utah Code Section 51, Chapter 7) (Act) and related Rules of the Money Management Council (Council) in handling its depository and investing transactions. District funds are deposited in qualified depositories as defined by the Act. The Act also authorizes the District to invest in the Utah Public Treasurers' Investment Fund (PTIF), certificates of deposit, US Treasury obligations, US agency issues, high-grade commercial paper, banker's acceptances, repurchase agreements, corporate bonds, money market mutual funds, and obligations of governmental entities within the State of Utah.

The PTIF is authorized and makes investments in accordance with the Act. The Council provides regulatory oversight for the PTIF. Participant accounts with the PTIF are not insured or otherwise guaranteed by the State of Utah. Participants in the PTIF share proportionally in the income, costs, gains and losses from investment activities. The degree of risk of the PTIF depends upon the underlying portfolio.

The Act and Council rules govern the financial reporting requirements of qualified depositories in which public funds may be deposited and prescribe the conditions under which the designation of a depository shall remain in effect. If a qualified depository should become ineligible to hold public funds, public treasurers are notified immediately. The District considers the actions of the Council to be necessary and sufficient for adequate protection of its uninsured bank deposits.

Rules of the Council allow Salt Lake Education Foundation to invest private grants, contributions, and endowments in any deposit or investment authorized by the Act and certain investment funds, equity securities, fixed-income securities, and investment strategies with institutions that meet certain restrictions.

All of the District's investments are with the PTIF and US Government agency bonds. The Foundation has deposits separate from the District and invests private funds through a broker.

#### **Notes to Basic Financial Statements**

Continued

**Deposits** – At June 30, 2005, the District and the Foundation have the following deposits with financial institutions:

	Carrying	Bank	Amount
	Amount	Balance	Insured
Salt Lake City School District Salt Lake Education Foundation	\$ 5,339,161 960,362	\$ 7,951,530 1,009,445	\$ 1,157,086 200,000
Total deposits	\$ 6,299,523	\$ 8,960,975	\$ 1,357,086

• Custodial credit risk – Custodial credit risk for deposits is the risk that, in the event of a bank failure, a government's deposits may not be returned to it. The District does not have a formal deposit policy for custodial credit risk. At June 30, 2005, the uninsured amount of the District's and Foundation's bank deposits was uncollateralized.

Investments – At June 30, 2005, the District and the Foundation have the following investments summarized by investment type and maturities:

			Investment Maturities (in Years)					
Investment Type		Fair Value		Less Than 1		1-5		More Than 10
Salt Lake City School District: Utah Public Treasurers' Investment Fund (PTIF) US Government agency bonds	\$	62,069,078 21,975,675 84,044,753	\$	62,069,078 4,000,000 66,069,078	\$	17,975,675 17,975,675	\$	- - -
Salt Lake Education Education Foundation, a component unit: Fixed government securities	_	1,89 <b>6,6</b> 13	_	1,351,639	_	506,587		38,387
Total investments	\$	85,941,366		67,420,717		18,482,262		38,387

- Interest Rate Risk Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. The District manages its exposure to interest rate risk by complying with the Act, which requires that the remaining term to maturity of investments to not exceed the period of availability of the funds invested. Except for endowments, the Act further limits the remaining term to maturity on all investments in commercial paper and bankers' acceptances to 270 days or less and fixed-income securities to 365 days or less. In addition, variable-rate securities may not have a remaining term to final maturity exceeding two years. The Foundation can invest private funds in fixed-income securities with a dollar-weighted average maturity not to exceed ten years.
- Credit Risk Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. The District's policy for reducing its exposure to credit risk is to comply with the Act and related rules. The Act and related rules limit investments in commercial paper to a first tier rating and investments in fixed-income and variable-rate securities to a rating of A or higher as rated by Moody's Investors Service, Inc. or by Standard and Poor's Corporation. The District has no investment policy that would further limit its investment choices.

#### **Notes to Basic Financial Statements**

Continued

At June 30, 2005, the District and the Foundation have the following investments subject to credit risk:

•		Credit Quality Ratings				
Investment Type	Fair Value	_	A or igher	Less tha	n	Unrated
Salt Lake City School District: Utah Public Treasurers'						
Investment Fund (PTIF)	<b>\$ 62,069,0</b> 78	\$	-	\$	-	\$ 62,069,078

- Concentration of Credit Risk Concentration of credit risk is the risk of loss attributed to the magnitude of a government's investment in a single issuer. The District's policy for managing this risk is to comply with the Act and related rules. The Act limits investments in commercial paper and or corporate obligations to 5% of the District's total portfolio with a single issuer. The District places no other limits on the amount it may invest in any one issuer. The Foundation can invest private funds in certain equity and fixed-income securities provided no more than 5% of all funds are invested in any one issuer and no more than 25% of all funds are invested in a particular industry. Also, for the Foundation's investments in private funds, no more than 75% may be invested in equity securities and no more than 5% in collateralized mortgage obligations.
- Custodial Credit Risk Custodial credit risk for investments is the risk that, in the event of the failure of the counterparty, a government will not be able to recover the value of investment or collateral securities that are in the possession of an outside party. The District's policy for managing this risk is to comply with the Act and related rules. The District places no other limit on the amount of investments to be held by counterparties. The Act requires the Foundation's public treasurer to have custody of all securities purchased or held or deposit these securities with a bank or trust company to be held in safekeeping by that custodian. The Foundation's investments held in a brokerage account are covered by Securities Investor Protection Corporation up to \$500,000.

#### 3. PROPERTY TAXES

The property tax revenue of the District is collected and distributed by the Salt Lake County treasurer as an agent of the District. Utah statutes establish the process by which taxes are levied and collected. The county assessor is required to assess real property as of January 1 and complete the tax rolls by May 15. By July 21, the county auditor is to mail assessed value and tax notices to property owners. A taxpayer may then petition the County Board of Equalization between August 1 and August 15 for a revision of the assessed value. The county auditor makes approved changes in assessed value by November 1 and on this same date the county auditor is to deliver the completed assessment rolls to the county treasurer. Tax notices are mailed with a due date of November 30. Delinquent taxes are subject to a 2% penalty, with a \$10 minimum penalty. If delinquent taxes and penalties are not paid by January 15 of the following year, these delinquent taxes, including penalties, are subject to an interest charge at an annual rate equal to the federal discount rate plus 6%; the interest period is from January 1 until date paid.

Motor vehicles are subject to an "age-based" fee that is due each time a vehicle is registered. The age-based fee is for passenger type vehicles and ranges from \$10 to \$150 based on the age of the vehicle. The revenues collected in each county from motor vehicle fees is distributed by the county to each taxing entity in which the property is located in the same proportion in which revenue collected from ad valorem real

#### **Notes to Basic Financial Statements**

Continued

property tax is distributed. The District recognizes motor vehicle fees as property tax revenue when the county collects the fee.

As of June 30, 2005, property taxes receivable by the District includes uncollected taxes assessed as of January 1, 2005 or earlier. It is expected that all assessed taxes (including delinquencies plus accrued interest and penalties) will be collected within a five-year period, after which time the county treasurer may force sale of property to collect the delinquent portion. The property taxes receivable and property taxes deferred revenue accounts at June 30, 2005 are summarized as follows:

		Major Funds	Other		
		Debt	Capital	Governmental	
	General	Service	Projects	Funds	Totals
Property taxes - receivable:

For the year ended June 30, 2005, depreciation expense was charges to function of the District as follows:

6,748,803

Supporting services:	
Counseling and child accounting	80,061
Media services and educational supervision	400,296
General district administration	147,401
General school administration	240,180
Operation and maintenance of school buildings	568,288
Student transportation	437,620

Child nutrition 758,216
Capital assets held by the District's internal service funds
are charged to the various functions based on their usage
of the assets 35,753
Total depreciation expense, governmental activities \$ 9,416,618

#### Notes to Basic Financial Statements

Continued

The District is obligated at June 30, 2005, under construction commitments as follows:

Project	Project Authorized	Costs to Date	Costs to Complete
Bonneville - Replace	\$ 8,759,746	\$ 7,761,859	\$ 997,887
Warehouse at Beardsley Place	2,144,328	1,8 <b>61,</b> 122	283,206
Northwest - Replace	20,316,428	16,695,860	3,620,568
Indian Hills - Replace	12,140,923	8,981,250	3,159,673
Bryant - Retrofit	4,941,608	1,196,325	3,745,283
Glendale - Replace	18,025,699	1,452,157	16,573,542
Highland Park - Replace	11,328,471	628,079	10,700,392
	\$ 77,657,203	\$ 38,576,652	\$ 39,080,551

A reservation of fund balance established in the *capital projects fund* for construction commitments of \$33,114,042 plus receipt of future property taxes and/or bond proceeds will be used to fulfill the required costs to complete at June 30, 2005.

#### 5. RETIREMENT PLANS

Defined Benefit Plans – The District contributes to the State and School Contributory Retirement System and State and the School Noncontributory Retirement System (collectively, the Systems) which are cost-sharing multiple-employer defined benefit pension plans administered by the Utah Retirement Systems (URS). URS provides refunds, retirement benefits, annual cost of living adjustments and death benefits to plan members and beneficiaries in accordance with retirement statues.

The Systems are established and governed by the respective sections of Chapter 49 of the Utah Code Annotated 1953, as amended. The Utah State Retirement Act in Chapter 49 provides for the administration of the URS and plans under the direction of the Utah State Retirement Board whose members are appointed by the Governor. The Systems issue a publicly available financial report that includes financial statements and required supplementary information for the Systems. A copy of the report may be obtained by writing to the Utah Retirement Systems, 540 East 200 South, Salt Lake City, UT 84102 or by calling 1-800-365-8772.

Plan members in the State and School Contributory Retirement System are required to contribute 1.00% of annual covered salary, 0.50% of this is covered by the District. In addition, the District contributes 12.21% of annual covered salary. For employees participating in the State and School Noncontributory System, the District contributes 11.70% of annual covered salary. The contribution rates are the actuarially determined rates. The contribution requirements of the Systems are authorized by statute and specified by the Utah State Retirement Board.

The District's contributions to the State and School Contributory Retirement System for the years ended June 30, 2005, 2004, and 2002 are \$632,567, \$544,499, and \$503,876, respectively, and employee contributions were \$21,980, \$21,422, and \$27,939, respectively. The District's contributions to the State and School Noncontributory Retirement System for the years ended June 30, 2005, 2004, and 2003 are \$13,284,720 \$10,462,292, and \$9,970,226 respectively. The contributions were equal to the required contributions for each year.

### SALT LAKE CITY SCHOOL DISTRICT Notes to Basic Financial Statements

Continued

Defined Contribution Plans – The District also participates in a defined contribution plan under Internal Revenue Code Section 401(k) to supplement retirement benefits accrued by participants in the Systems. Employees covered by the State and School Noncontributory Retirement System have a contribution of 2.0% of covered salaries automatically made by the District. Employees participating in the Systems can make additional contributions to the 401(k) plan up to specified limits. Contributions and earnings may be withdrawn by the employee upon termination or may be used as supplemental income upon retirement. The employer 401(k) contributions for the years ended June 30, 2005, 2004 and 2003 are \$2,188,689, \$1,907,514, and \$1,949,120, respectively; the employee contributions for the years ending June 30, 2005, 2004 and 2003 are \$3,132,275, \$2,597,467, and \$2,666,100, respectively. The 401(k) plan funds are fully vested to the participants at the time of deposit. Plan assets are administered and held by URS.

The District also offers its employees a deferred compensation plan created in accordance with Internal Revenue Service Code Section 457. The plan, available to all full-time employees, permits them to defer a portion of their salary until future years. Employees are eligible to voluntarily participate from the date of employment and are vested immediately upon participating. Employee contributions to the Section 457 plan totaled \$277,706 for the year ended June 20, 2005. The assets of the plan are administered and held by URS and a third-party administrator.

Termination Benefits – In accordance with employee agreements the District provides post-employment health care benefits for employees retiring under the retirement incentive program, with a portion of the cost incurred by the District. The expense for all retirees for the year ended June 30, 2005 is \$465,085 and the total liability at June 30, 2005 is \$1,527,162. This liability is serviced though the internal service fund. The District recognizes the liability and expense in the year in which an employee retires. The District accrues the costs for its 115 retirees using current insurance premiums as the basis for determining the liability. No liability has been recorded for current employees who may qualify for this benefit at a future date.

#### 6. RISK MANAGEMENT

The District is exposed to various risks of loss related to torts; errors and omissions; violation of civil rights; theft of, damage to, and destruction of assets; and natural disasters. These risks are covered by the District's participation in the State Risk Management System for school districts. This is a pooled arrangement where the districts pay experienced rated annual premiums which are designed to pay claims and build sufficient reserves so that the system will be able to protect the participating entities with its own capital. The pool reinsures excess losses to preserve the capital base. Property physical damage is insured to replacement value with a \$1,000 deductible; automobile physical damage is insured to actual value with a \$500 deductible; other liability is limited to the lesser of \$10 million or the statutory limit. Insurance coverage by major category of risk has remained relatively constant as compared to the prior fiscal year.

The District self insures its workers compensation liability and retains a third-party administrator to process claims. All requirements of the State Industrial Commission related to maintaining a self-insured status have been met. At June 30, 2005, an estimate of all future costs based on open claims was recorded as a liability of \$109,868; this liability is serviced through the internal service fund. The District carries a coinsurance policy to cover individual claims in excess of \$400,000. A reconciliation of the accrued liability is as follows:

#### **Notes to Basic Financial Statements**

Continued

	Workers Compensation				
	2005			2004	
Accrued Liability - July 1	\$	95,243	\$	121,346	
Charges for Services		329,652		360,575	
Claims Paid		(315,027)		(386,678)	
Accrued Liability - June 30	\$	109,868	\$	95,243	

Unemployment compensation is handled on a cost of benefits reimbursement basis with the State of Utah.

The District provides commercial insurance for major medical and accident risks along with separate life insurance and long-term disability policies. Additional liabilities are not incurred from the settlement of claims under these policies.

The District self insures dental benefits for employees and retains a third-party administrator to process claims. At June 30, 2005, the current unpaid and the incurred but not reported liabilities were recorded for \$660,105. This liability is recorded in the internal service fund. This liability is the District's best estimate based on available information from the third-party administrator. A reconciliation of the accrued liability is as follows:

	Dental Benefits				
		2005		2004	
Accrued Liability - July 1	\$	\$ 736,190		936,190	
Charges for Services		640,853		684,828	
Claims Paid		(716,938)		(884,828)	
Accrued Liability - June 30	\$	660,105	\$	7 <b>36</b> ,190	

There have been no significant changes in insurance coverage from those in force in the prior year. During the last three fiscal years there have been no insurance settlements which have exceeded the limits of our insurance coverage.

	\$	140,667,722

#### **Notes to Basic Financial Statements**

Continued

The general obligation bonded debt of the District is limited by state law to 4% of the fair market value of the total taxable property in the District. The legal debt limit at June 30, 2005, is \$777,772,524. General obligation debt net of deferred amounts on refunding and unamortized premiums and discounts at June 30, 2005 is \$140,383,513, resulting in a legal debt margin of \$637,389,011.

Advance Refunding – April 20, 2005 – The District issued \$19,665,000 of general obligation refunding bonds (Series 2005B) to provide resources to purchase U.S. Government State and Local Government Series securities that were placed in an irrevocable trust for the purpose of generating resources for all future debt service payments of \$19,905,000 of general obligation bonds. As a result, the refunded bonds are considered to be defeased and the liability has been removed from the government-wide financial statements. The reacquisition price exceeded the net carrying amount of the old debt by \$1,110,268. This amount is being netted against the new debt and amortized over the life of the new refunding bonds, which is shorter than the remaining life of the refunded bonds. This advance refunding was undertaken to reduce total debt service payments over the next seventeen years by \$3,217,027 and resulted in an economic gain of \$673,247.

**Bond Election** – On May 4, 1999, the public voted to authorize the District to issue \$136,000,000 of general obligation bonds for new school construction, land acquisition, and renovation of existing school facilities and related equipment and improvements. Of the \$136,000,000 authorization, the District has issued \$104,742,722 leaving a remaining authorized but not issued amount of \$31,257,278 at June 30, 2005.

#### 9. DESIGNATED FOR UNDISTRIBUTED RESERVE

Utah state law allows for the establishment of an "undistributed reserve" in the general fund. The Board must authorize expenditures from the undistributed reserve. This reserve is for contingencies. According to State law, the District may not use undistributed reserves in the negotiation or settlement of contract salaries for District employees. The undistributed reserve may not exceed 5% of the current fiscal year's total general fund budgeted expenditures. Use of the reserve requires a written resolution adopted by a majority vote of the Board filed with the Utah State Board of Education and State Auditor.

#### 10. LITIGATION AND LEGAL COMPLIANCE

There are several lawsuits pending in which the District is involved. The District's counsel and insurance carriers estimate that the potential claims against the District, not covered by insurance, resulting from such litigation would not materially effect the financial statements of the District.

#### 11. GRANTS

The District receives significant financial assistance from federal and state governmental agencies in the form of grants. The disbursement of funds received under these programs generally requires compliance with terms and conditions specified in the grant agreements and is subject to audit by the District's independent auditors and other governmental auditors. Any disallowed claims resulting from such audits could become a liability of the *general fund* or other applicable fund. Based on prior experience, District administration believes such disallowance, if any, would be immaterial.

### COMBINING AND INDIVIDUAL FUND FINANCIAL STATEMENTS AND SCHEDULES

#### Major Governmental Funds

#### General Fund

By Definition the general fund is a major fund. However, the general fund is presented in the basic financial statements.

To account for resources which are not required to be accounted for in any other fund. Revenues and expenditures of categorical federal and state programs are accounted for in this fund, if they are for the kindergarten through grade 12 regular day school programs.

#### **Debt** Service Fund

To account for the accumulation of resources and the payment of general obligation bond principal and interest due annually. Financing is provided by an annual property tax levy authorized by Utah Code 53A-16-104 and 53A-17a-145.

#### Capital Projects Fund

To account for resources collected by property taxes authorized by Utah Code Annotated (1953, as amended), Sections 53A -21-102 and 53A -17a-145. Taxes collected pursuant to this authority can be used for Debt Service, acquiring and improving sites, construction and remodeling facilities, and purchasing equipment, books, and supplies, necessary for providing educational programs for all students within the District.

# Schedule of Revenues, Expenditures and Changes in Fund Balances - Budget and Actual General Fund

Year Ended June 30, 2005

#### Nonmajor Governmental Funds

#### Special Revenue Funds

#### Special Programs Fund

To account for the operations of community school, various recreation programs and other major, non-regular day programs primarily funded by state and federal grants of the District.

#### Child Nutrition Fund

This fund accounts for the operation of the District's school lunch and breakfast programs, contract catering services, and a summer program for economically disadvantaged children. Revenues are generated through cash sales of food items in addition to federal and state subsidies.

#### Internal Service Funds

#### Distribution Services Fund

To account for services provided to departments and schools in the District by the central warehousing system. Such costs are recovered by charging more than the invoice cost for items distributed through the warehouse.

#### Printing/Graphics Fund

To account for printing services provided to departments and schools in the District by the District's printing shop. Costs are recovered by charges to user departments and schools.

#### Technical Services Fund

To account for repair services provided to the various departments and schools of the District. Costs are recovered by charges to user departments and schools.

#### Employee Benefits Fund

To account for resources set aside for accrued vacation and sick leave payments, early retirement insurance benefits, dental insurance payments and worker's compensation payments

#### Fiduciary Fund

Student Activities Fund (An Agency Fund)

This fund accounts for resources that belong to the student bodies of the various schools. It accounts for activities such as sports, dances, plays, clubs, etc. These resources are in the custody of school employees but are the property of the students and not the Board of Education.

Note

<sup>(1)</sup> Current collections of taxes in 1998-99 were reduced by a one time refund to US West for \$1,650,890. If this refund had not occurred current collections would have been \$67,690,214 or 96.25% of taxes assessed total collections would have been \$68,643,530 or 97.61% of current assessment

<sup>(2)</sup> Taxes assessed includes the fee in lieu of property tax on motor vehicles. Excludes redevelopment.

<sup>(3)</sup> In 2002-03, the method of recognizing property tax revenue was changed. 2001-02 was restated to reflect this change, however, all other preceding years were not restated.

#### Computation of Legal Debt Margin

June 30, 2005

Valuations:		
Taxable value of all property	\$	16,034,404,125
	=	
	•	
Fair market value of all property	\$	<b>19,444,313,</b> 097
Debt limit at 4% of total fair market value		777,772,524
Less outstanding general obligation bonds payable,		
net of deferred amounts on refunding and unamortized		
premiums and discounts	_	(140,383,513)
Debt Margin	\$_	637,389,011
	=	

#### Notes:

The General Obligation Bonded Debt of the District is limited by Utah law to 4% of the fair market value of the total taxable property in the District. For tax purposes primary residential property is assessed at 55% of its fair market value. All other taxable property is assessed at 100% of its fair market value.

Demographic and
Miscellaneous Statistical Data

#### Origin:

The Salt Lake City School District was created by Article X, Section 6 of the Constitution of the State of Utah, which was passed by a vote of the people on the first Tuesday of November, 1875 and accepted by the United States Government on January 4, 1896.

The School District is given the responsibility by the Constitution and statutes of educating all persons within its boundaries, kindergarten through grade twelve.

#### Schools:

During the 2004-05 fiscal year, the school district operated:

- 27 Elementary schools
- 5 Intermediate schools
- 4 High schools, and
- 3 Special schools

# SALT LAKE CITY SCHOOL DISTRICT NOTES TO SCHEDULE OF EXPENDITURES OF FEDERAL AWARDS

#### Note 1. General

The schedule of expenditures of federal awards presents the activity of all federal award programs of Salt Lake City School District (District). The District reporting entity is defined in Note 1 to the District's financial statements. All federal awards received directly from federal agencies as well as federal awards passed through from other government agencies are included on the schedule.

#### Note 2. Basis of Accounting

The accompanying schedule of expenditures of federal awards is presented using the modified accrual basis of accounting for assistance received by governmental fund types, which is described in Note 1 to the District's financial statements.

Entitlements and shared revenues are recorded at the time of receipt or earlier if the susceptible to accrual criteria are met. Expenditure-driven grants are recognized as revenue when the qualifying expenditures have been incurred and all other grant requirements have been met. Donated food commodities are recorded at fair value at the date of contribution to the District.

# Note 3. Relationship to District's Financial Statements

Federal awards expended on the schedule of expenditures of federal awards for the year ended June 30, 2005 are reconciled to the amounts reported in the District's financial statements as federal government revenues as follows:

General Fund	\$	14,483,282
Child Nutrition Fund (Enterprise Fund)	*	6,834,626
Special Programs Fund (Special Revenue Fund)		7,485,523
Total amount reported in the financial statements		28,803,431
Service provider contracts not included on schedule		(2,348,083)
Schedule of Expenditures of Federal Awards	\$	26,455,348

Independent Auditor's Report on Internal Control Over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements

Performed in Accordance with Government Auditing Standards

Board of Education Salt Lake City School District

We have audited the financial statements of the governmental activities, each major fund, and the aggregate remaining fund information of Salt Lake City School District as of and for the year ended June 30, 2005 and have issued our report thereon dated September 16, 2005. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

#### **Internal Control Over Financial Reporting**

In planning and performing our audit, we considered Salt Lake City School District's internal control over financial reporting in order to determine our auditing procedures for the purpose of expressing our opinion on the financial statements and not to provide assurance on the internal control over financial reporting. Our consideration of the internal control over financial reporting would not necessarily disclose all matters in the internal control over financial reporting that might be material weaknesses. A material weakness is a condition in which the design or operation of one or more of the internal control components does not reduce to a relatively low level the risk that misstatements in amounts that would be material in relation to the financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. We noted no matters involving the internal control over financial reporting and its operation that we consider to be material weaknesses. However, we noted other matters involving the internal control over financial reporting that we have reported to management of Salt Lake City School District in a separate letter dated September 16, 2005.

#### **Compliance and Other Matters**

As part of obtaining reasonable assurance about whether Salt Lake City School District's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts and grants agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance that are required to be reported under *Government Auditing Standards*. However, we noted certain immaterial instances of noncompliance or other matters, which we have reported to management of Salt Lake City School District in a separate letter, dated September 16, 2005.

This report is intended solely for the information and use of the Board of Education, management, and federal awarding and pass-through entities and is not intended to be and should not be used by anyone other than these specified parties.

Independent Auditor's Report on Compliance with Requirements Applicable to Each Major Program and Internal Control Over Compliance in Accordance with OMB Circular A-133

Board of Education
Salt Lake City School District

#### Compliance

We have audited the compliance of Salt Lake City School District with the types of compliance described in the U.S. Office of Management and Budget (OMB) Circular A-133 Compliance Supplement that are applicable to each of the major federal programs for the year ended June 30, 2005. Salt Lake City School District's major federal programs are identified in the summary of auditor's results section of the accompanying schedule of findings and questioned costs. Compliance with the requirements of laws, regulations, contracts and grants applicable to each of its major federal programs is the responsibility of Salt Lake City School District's management. Our responsibility is to express an opinion on Salt Lake City School District's compliance based on our audit.

We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*. Those standards and OMB Circular A-133 require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about Salt Lake City School District's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion. Our audit does not provide a legal determination on Salt Lake City School District's compliance with those requirements.

In our opinion, Salt Lake City School District complied, in all material respects, with the requirements referred to above that are applicable to each of its major federal programs for the year ended June 30, 2005.

#### **Internal Control Over Compliance**

The management of Salt Lake City School District is responsible for establishing and maintaining effective internal control over compliance with requirements of laws, regulations, contracts and grants applicable to federal programs. In planning and performing our audit, we considered Salt Lake City School District's internal control over compliance with requirements that could have a direct and material effect on a major federal program in order to determine our auditing procedures for the purpose of expressing our opinion on compliance and to test and report on internal control over compliance in accordance with OMB Circular A-133.

Our consideration of the internal control over compliance would not necessarily disclose all matters in the internal control that might be material weaknesses. A material weakness is a reportable condition in which the design or operation of one or more of the internal control components does not reduce to a relatively low level the risk that noncompliance with applicable requirements of laws, regulations, contracts and grants caused by error or fraud that would be material in relation to a major federal program being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. We noted no matters involving the internal controls over compliance and its operation that we consider to be material weaknesses.

#### **Schedule of Expenditures of Federal Awards**

We have audited the financial statements of Salt Lake City School District as of and for the year ended June 30, 2005 and have issued our report thereon dated September 16, 2005. Our audit was performed for the purpose of forming an opinion on the financial statements taken as a whole. The accompanying schedule of expenditures of federal awards is presented for purposes of additional analysis as required by OMB Circular A-133 and is not a required part of the financial statements. Such information has been subjected to the auditing procedures applied in the audit of the financial statements and, in our opinion, is fairly stated, in all material respects, in relation to the financial statements taken as a whole.

This report is intended solely for the information and use of the Board of Education, management, and federal awarding agencies and pass-through entities and is not intended to be and should not be used by anyone other than these specified parties.

# Independent Auditor's Report on Legal Compliance in Accordance with the Utah State Legal Compliance Audit Guide

Board of Education
Salt Lake City School District

We have audited the financial statements of the governmental activities, each major fund, and the aggregate remaining fund information of Salt Lake City School District as of and for the year ended June 30, 2005 and have issued our report thereon dated September 16, 2005. As part of our audit, we have audited the District's compliance with the requirements governing types of services allowed or unallowed; eligibility; matching, level of effort, or earmarking; and special tests and provisions applicable to each of its major state assistance programs as required by the *State of Utah Legal Compliance Audit Guide* for the year ended June 30, 2005. The District received the following major state assistance programs from the State of Utah (each passed through the State Office of Education):

Minimum School Program
Driver Education
Fall Enrollment and Dropout Reporting

Student Membership Reporting Adult Education Reporting

The District also received other state grants, which are not required to be audited for specific compliance requirements; however, these grants were subject to testwork as part of the audit of the District's financial statements.

Our audit also included test work on the District's compliance with those general compliance requirements identified in the State of Utah Legal Compliance Audit Guide including:

Public Debt
Purchasing Requirements
Truth in Taxation and Property Tax Limitations

Cash Management
Budgetary Compliance
Other General Compliance Issues

The management of the District is responsible for the District's compliance with all compliance requirements identified above. Our responsibility is to express an opinion on compliance with those requirements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether material noncompliance with the requirements referred to above occurred. An audit includes examining, on a test basis, evidence about the District's compliance with those requirements. We believe that our audit provides a reasonable basis for our opinion.

The results of our audit procedures disclosed instances of noncompliance with certain requirements referred to above, which are described in the accompanying letter to management. We considered these instances of noncompliance in forming our opinion on compliance, which is expressed in the following paragraph.

In our opinion, Salt Lake City School District complied, in all material respects, with the general compliance requirements identified above and the requirements governing types of services allowed or unallowed; eligibility; matching, level of effort, or earmarking; reporting; and special tests and provisions that are applicable to each of its major state assistance programs for the year ended June 30, 2005.

#### Letter to Management

September 16, 2005

Board of Education Salt Lake City School District

In planning and performing our audit of the financial statements of Salt Lake City School District for the year ended June 30, 2005, we noted certain matters for your consideration. This letter summarizes our comments and suggestions regarding those matters. This letter does not affect our report dated September 16, 2005, on the financial statements of the District. Also, reportable conditions and material internal control weaknesses, if any, are included in our reports dated September 16, 2005, in accordance with Government Auditing Standards and the provisions of Office of Management and Budget Circular A-133, Audits of States, Local Governments, and Non-Profit Organizations.

#### Prior Year Comments

Comments from audits of prior years have been addressed and have been or are being resolved. Certain prior-year comments are repeated for your consideration.

Capital asset accounting – The District has prepared and updated its capital asset and depreciation schedules and has made periodic inventory checks. Separate spreadsheets track asset information by class or fund. We recommended all capital assets accounting be consolidated into one database or be managed with one depreciation software program. During the 2006 fiscal year, the District will convert capital asset information to the new system.

#### Current Year Comments

<u>Purchasing</u> – We tested several purchasing transactions during the year ended June 30, 2005. We observed that certain purchasing practices may need to be modified or established policies should be more closely followed:

Purchase orders should be prepared as part of the approval process and prior to ordering and receiving the applicable goods and services. In a few instances, we noted purchase orders being prepared after the purchasing process was complete or the purchase order was waived.

Exceptions to purchasing policies should be carefully evaluated and decisions should be documented, especially for purchases from vendors designated as "sole source" or "preferred."

Documentation should be retained providing evidence that phone bids were obtained for smaller purchases; the decision process of why a vendor was selected should be retained on file.

<u>Payroll</u> – We noted from our tests of transactions that three employees were paid incorrect rates and one employee was overpaid.

<u>Individual schools</u> – We visited thirteen schools near the end of the school year. We reviewed financial, membership, and equipment records. We noted that certain schools could be more consistent in

- obtaining principal approvals for all expenditures,
- retaining adequate documentation of transactions,
- ensuring that deposits and reconciliations are consistently reviewed,
- preparing backups of data files, and
- complying with District reporting policies.

<u>Certifications</u> — We noted that formal certifications as required by OMB Circular A-87 to support allocation of payroll costs to restricted federal programs are not always adequately documented. We recommend that monthly certifications be obtained for individuals who work in more than one program and when at least one of the programs is federal. We also recommend that semi-annual certifications be obtained for employees that work in one federal program.

New standard – Government Accounting Standards Board Statement No. 44, Economic Condition Reporting: The Statistical Section, is effective for periods beginning after June 15, 2005. This new standard amends prior guidance on the preparation of statistical information that is included with financial statements. We encourage the District to review the new standard and gather information the District intends to present within the statistical section of future financial reports.

Views of Responsible Officials – The capital asset accounting module of the new accounting system is being implemented. New acquisitions are being recorded on the new system and items from the old system will be brought over and incorporated into one system as resources are available. Purchasing policies and procedures are being reviewed and adjusted and we will continue to train employees in following these. We will review payroll policies and procedures and train employees and to strengthen controls to ensure payroll is accurate. Steps are being taken to provide schools with additional training and follow-up reviews through the year. Steps are being taken to obtain required certifications during this year. The new reporting standard will be implemented with the annual financial report for the year ended June 30, 2006.

We will review the status of these comments during our next audit engagement. We have already discussed in detail these comments and suggestions with management and we will be pleased to discuss them in further detail at your convenience, to perform any additional study of these matters, or to assist you in implementing recommendations. We appreciated being able to work with District personnel in our audit. We note those we worked with in the audit process were responsive and helpful.
